Appendices

Appendix A – Building Descriptors Table [1]	Tabular summary and classification of building descriptors
Appendix B – Modeling Data [2]	Modeling data and assumptions by building type and space use. For technical documentation on plug loads, click here [3].
Appendix C – Schedules [4]	Default and prescribed schedules of operation.
Appendix D – Construction Materials [5]	Default construction materials library.
Appendix E – Software Tests [6]	Spreadsheets and specifications for software tests.
Appendix F – Energy Costs [7]	Documentation of the methodology used to develop the Chapter 5 energy costs.
Appendix G – XML Schema	The COMNET compliant XML schema specified in Chapter 4 and supported by the COMNET Portal.
Appendix H – Equipment Curves [8]	Spreadsheet that summarizes and graphs the default equipment performance curves referenced in the Modeling Guidelines and Procedures.
